Please note: The images in this catalog may not accurately reflect the true colors, veining, and textures of our marble slabs, due to natural variations in quarry extraction and limitations of digital displays. Additionally, some images were automatically generated to stage and illustrate our slabs. For the most accurate evaluation, we highly recommend visiting us in person to view the actual slabs and explore the full range of available options.

About Us

Part of the Intersig Karkachi & Fath family group, a leader in Morocco's construction sector, SINASTONE is an iconic project driven by the second and third generations: Adil Ibnoussina, General Manager, and Fatima Zahra Jama, Deputy Director. Their alliance blends experience with innovation, giving SINASTONE a unique identity rooted in tradition and forward-thinking.

A pioneer in ornamental stones, SINASTONE delivers excellence from extraction to transformation. We specialize in high-quality marble, granite, quartzite, and semi-precious stones, driven by a passion for noble materials and refined craftsmanship.

Our quarries are located in geologically rich regions, carefully selected to ensure the natural purity and beauty of each block.

Backed by a cutting-edge factory, SINASTONE blends tradition and innovation to redefine design.

On July 5, 2024, SINASTONE inaugurated its 45,000 m² factory and showroom in Casablanca, supported by a 130 million dirham investment. Attended by key dignitaries, the event marked a new strategic vision and brand identity, positioning the company as a leader in the natural stone industry.

In November 2024, SINASTONE became the first Moroccan firm in its sector to receive the “Made in Morocco” label during the International Building Exhibition (SIB 2024), reinforcing its reputation for excellence and innovation.

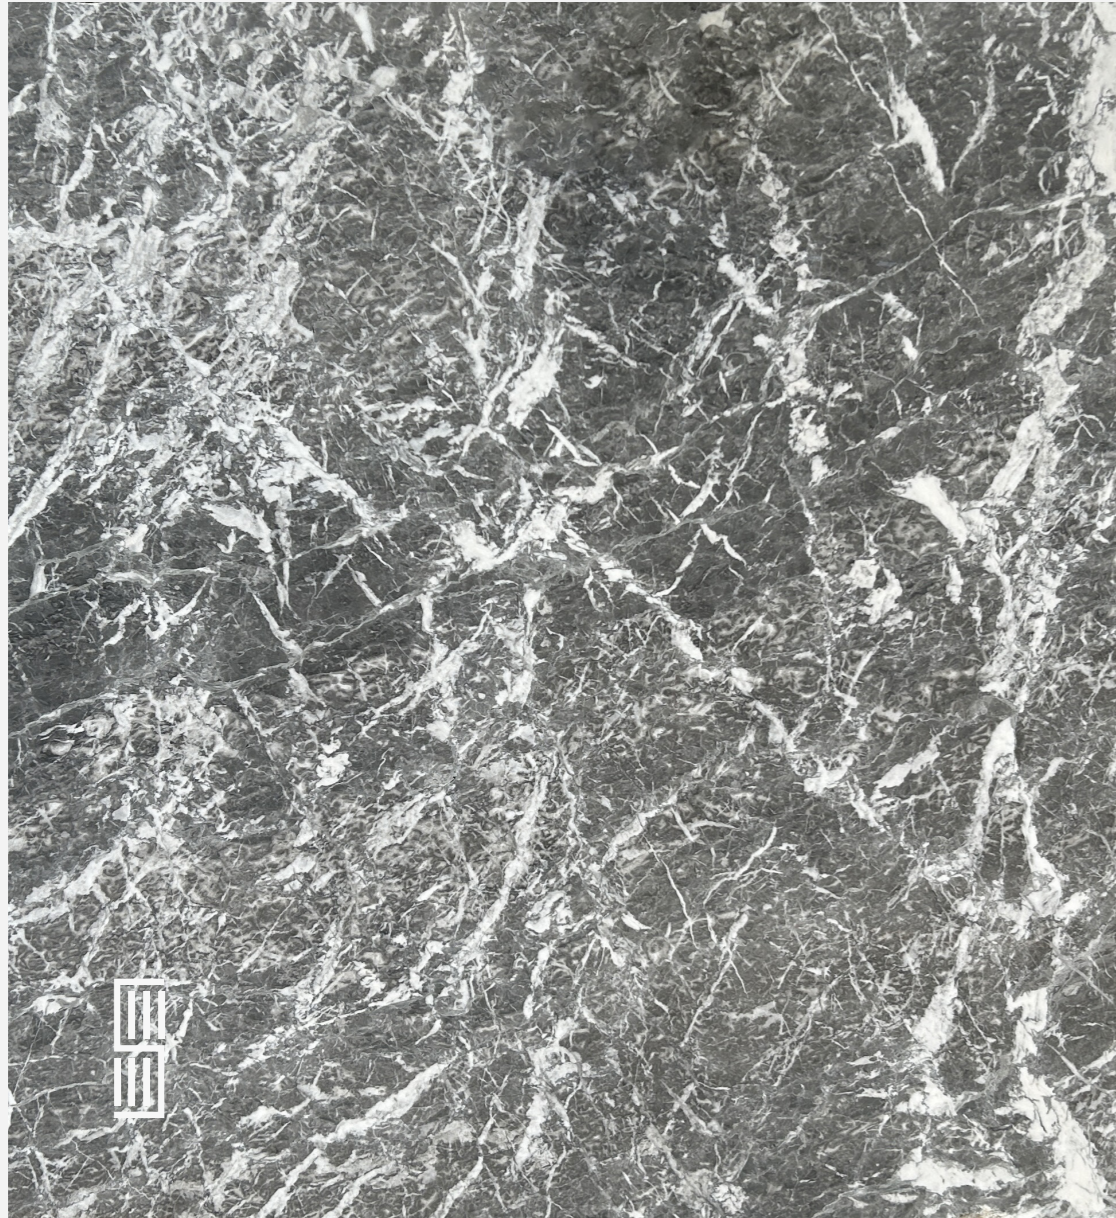

The facility includes five production units—sawing, resin treatment, polishing, cutting, and precision machining—operated by 200 skilled professionals. With technologies such as 5-axis CNC, Water Jet CNC, Scan Image Share systems, and QR code traceability, SINASTONE merges craftsmanship with digital precision, ensuring quality and transparency.

This investment establishes SINASTONE as a pioneer, combining heritage, technology, and sustainability to deliver premium solutions for modern architecture and design.

Toubkal Grays

New Grigio Carnico

The New Grigio Carnico marble captures Morocco's natural beauty with a rich gray base and white veining. This striking contrast creates a unique and artistic character in every slab. Sourced from our quarry, it brings a sophisticated, eye-catching element to interiors. Ideal for both modern and classic spaces, this marble adds elegance, depth, and timeless appeal, elevating residential and commercial designs alike.
